

IQeye 4 Series Dome High-resolution IP Cameras

The IQeye 4 Series Dome camera offers high performance in an entry-level, compact, versatile and attractive mini-dome package. It is available in VGA, 1.3 megapixel, or 2.0 megapixel resolutions, making it the highest resolution mini-dome camera in its class.

The versatile IQeye 4 Series Dome camera is designed for discreet indoor use, and works perfectly for ceiling surface mount applications. An optional mounting accessory kit expands the IQeye 4 Series Dome mount options to include wall and pendant mounting.

Like the IQeye 4 Series traditional camera, the IQeye 4 Series Dome is full Power-over-Ethernet capable, so all that is required for installation is connecting to a PoE enabled Ethernet cable and the IQeye 4 Series Dome is ready to go.

With versatility for all commercial, retail and residential environments, the IQeye 4 Series makes quality high-definition surveillance a reality.
